| Volatile acidity | 0.29 g/l | Free sulphurous | 20 mg/l |
| Total acidity | 5.37g/l | | |

2024 VINTAGE FEATURES

We are very proud of this wine, which is the result of a project that dates back to 2017. At that time, we decided to plant an Albana vineyard with the **GENTILE DI BERTINORO clone**, a clone that has been rarely used in the Bertinoro area since the 1970s

Compact bunches, persistent acidity, and light tannins

Our aim was to highlight the grape variety and terroir and to avoid any winemaking methods that could alter their characteristics. Therefore, our motto is:

**NO AMPHORES, NO BARRIQUE, NO MACERATION
BEAUTY IS NAKED**
